URGENT MEDICAL *SUPPLY*

The COVID-19 crisis resulted in a number of American physicians, farmers, private-based business owners coming together to help address an ailing medical supply chain. They pooled their own money and resources together to assist in the problem at hand.

This good will resulted in the creation of Urgent Medical Supply. Our team reached out to trustworthy business partners overseas who shared the same vision, which has resulted in securing a reliable a PPE supply chain comprised of FDA/CDC registered facilities. Furthermore, the team developed proper sanitizing protocols which are being implemented for fulfillment ensuring the safety of every package that is shipped out.

QUALITY

All UMS manufacturing facilities are fully authorized and approved for use in hospitals, clinics and other health care facilities.

SAFETY

Our verified overseas suppliers are GMP/ISO certified to ensure the highest standards of safety.

TRANSPARENCY

Full disclosure of supply chain costs ensuring that you are guaranteed the lowest pricing available.

URGENT MEDICAL SUPPLY

Doctors - BE AWARE. BE INFORMED FDA REGISTRATION VS APPROVAL

FDA ESTABLISHMENT/FACILITY REGISTRATION

Owners or operators of places of business (also called establishments or facilities) that are involved in the production/distribution of medical devices intended for use in the U.S. are required to register annually with the FDA. This process is known as **establishment registration**. In China, you will see third-party registrations such as this to the right:

"FDA does not issue Registration Certificates to medical device establishments. FDA does not certify registration and listing information for firms that have registered and listed. Registration and listing does not denote approval or clearance of a firm or their devices." --FDA.gov

Most establishments that are required to register with the FDA are also required to list the devices that are made there, and the activities that are performed on those devices. A Company is given an Owner/Operator Number that can be validated on <https://www.accessdata.fda.gov/>.

This simply means the MANUFACTURER has only registered their company, but this DOES NOT mean that their products have been tested and/or approved for medical use. The filtering capacity cannot be guaranteed!!

FDA APPROVAL

An Emergency Use Authorization for Medical Devices was issued to help deal with the shortage of respirator masks ,and included Non-NIOSH KN95 respirator masks to be used in the United States. The FDA then created an official list of manufacturers that had met all applicable FDA safety standards called the "Non-NIOSH-Approved Disposable Filtering Facepiece Respirators Manufactured in China."

This is the ONLY FULLY AUTHORIZED AND APPROVED list of manufacturers whose products have been tested and have been verified, to be imported into the US for use in hospitals, clinics and other health care facilities.

Visit <https://www.fda.gov/media/136663/download>

ALL Urgent Medical Supply manufacturers can be found on the FDA APPROVED respirator mask list ensuring the highest levels of compliance, safety and quality.

Appendix A: Authorized Respirators Updated: April 14, 2020

The Authorized Respirators

Authorized respirators should be used in accordance with CDC's recommendations. For the most current CDC recommendations on optimizing respirator use, please visit CDC's webpage: [Strategies for Optimizing the Supply of N95 Respirators](#).

Authorized Imported, Non-NIOSH Approved Respirators Manufactured in China

| Manufacturer | Respirator Model(s) | Country of Manufacture |
|--|--|------------------------|
| 3M | 9001, 9002, 9501, 9501+, 9501V+, 9502, 9502+, 9502V+, 9505+, 9541, 9541V, 9542, 9542V, 9552, 9552V | China |
| Allimed | KN95 Particulate Respirator LP220002 | China |
